

# Innovative pipe systems for increased security requirements

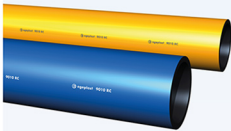

## Open-trench installation

in a sand bed      without a sand bed

egeplast  
**90 10® RC**

Puncture-resistant

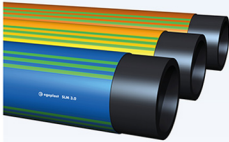

The egeplast **90 10® RC** is a pressure pipe system to transport gas, water and sewage. 100 years of service life even without a sand bed.

## Trenchless installation methods

Additional protection

egeplast  
**SLM® 3.0**

Puncture-resistant

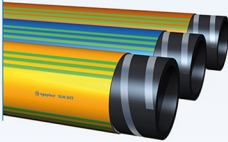

Scratch- and score-mark-resistant

The egeplast **SLM® 3.0** is a protective layer pipe system to ensure damage-free installation. Suitable for butt-welding thanks to a design based on homogeneous materials.

Quality check of damage-free installation

egeplast  
**SLM® DCT**

Puncture-resistant

Scratch- and score-mark-resistant

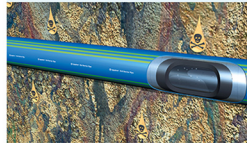

Quality control

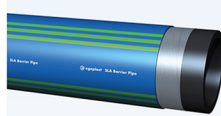

The egeplast **SLM® DCT** is a protective layer pipe system to enable quality control for trenchless installation.

## Special applications

Barrier layer to ensure special protection of drinking water

egeplast  
**SLA® Barrier Pipe**

Puncture-resistant

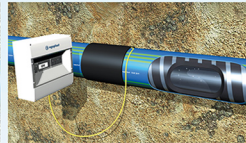

Scratch- and score-mark-resistant

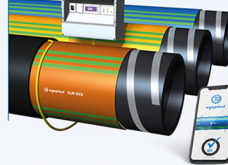

Diffusion-tight

The egeplast **SLA® Barrier Pipe** is a permeation-tight pipe system to provide special drinking water protection. Locatable.

Early warning system for monitoring critical infrastructure

egeplast  
**SLM® DCS**

Puncture-resistant

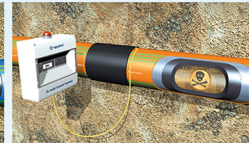

Scratch- and score-mark-resistant

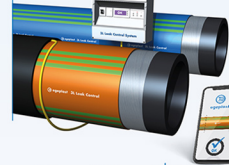

Leakage-monitoring

The egeplast **SLM® DCS** is a protective layer pipe system to enable early detection of pipe damage and precise locating of leaks. Locatable.

Permanent monitoring to protect the environment

egeplast  
**3L Leak Control**

Puncture-resistant

Scratch- and score-mark-resistant

Diffusion-tight

Leakage-monitoring

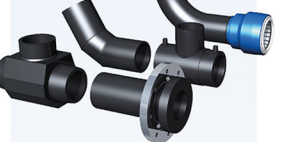

The egeplast **3L Leak Control** is a safety pipe system equipped with a barrier layer for permanent monitoring and precise locating of leaks. Locatable.

## Fitting program

Standard fittings & special fabrications at its best

egeplast  
**egeFit®**

Easy installation

Made from high quality PE 100/PE 100RC

Individually manufacturable

Active project support

PE fittings for pressure and value-added pipe systems as well as chambers and special assemblies according to customer specifications and individual requirements.
