

Project National Grid:

Installation HexelOne® SLM DCT System

Project data

Project description :	Building a 19 bar biogas line in Fakenham (Great Britain)
Challenges:	Only 3 weeks civil engineering time for a 1400 meter long high pressure line
Solution:	HexelOne® SLM DCT, delivered in coils, for this pilot project egeplast also executed the welding service under difficult conditions
Installation:	Open trench installation
Pipe material used:	HexelOne® SLM DCT OD 110 mm 1400 m
Parties involved in the project:	National Grid
