

Project Hongkong:

7/WSD/08 Water Supply Department, Hong Kong

Project data

Project description :	7/WSD/08 in Kwun Tong area, Hong Kong, rehabilitation of water mains
Challenges:	Very heavy traffic. Rush hour traffic and delivery traffic during the day made a closure of the road impossible.
Solution:	900 mtr rehabilitation of 425mm ID concrete pipe.
Installation:	Coiled lengths of Egeliner in lengths of 134 mtrs
Pipe material used:	Egeliner PE100+ blue to BSEN12201
Parties involved in the project:	Main contractor Ming Hing Waterworks Hong Kong, ScanTech (HK) Limited as supplier and Karsten Nielsen as certified installer.
